

Get Back to
Wood

www.starflush.in

Bring life to Your interiors

Star Multiwood offers an exciting range of PVC Foam boards that can effectively substitute wood, that too without disturbing nature.

Decades of experience in construction industry that we enjoy, has equipped us to provide the best to our valued customers.

You always wanted it And its here

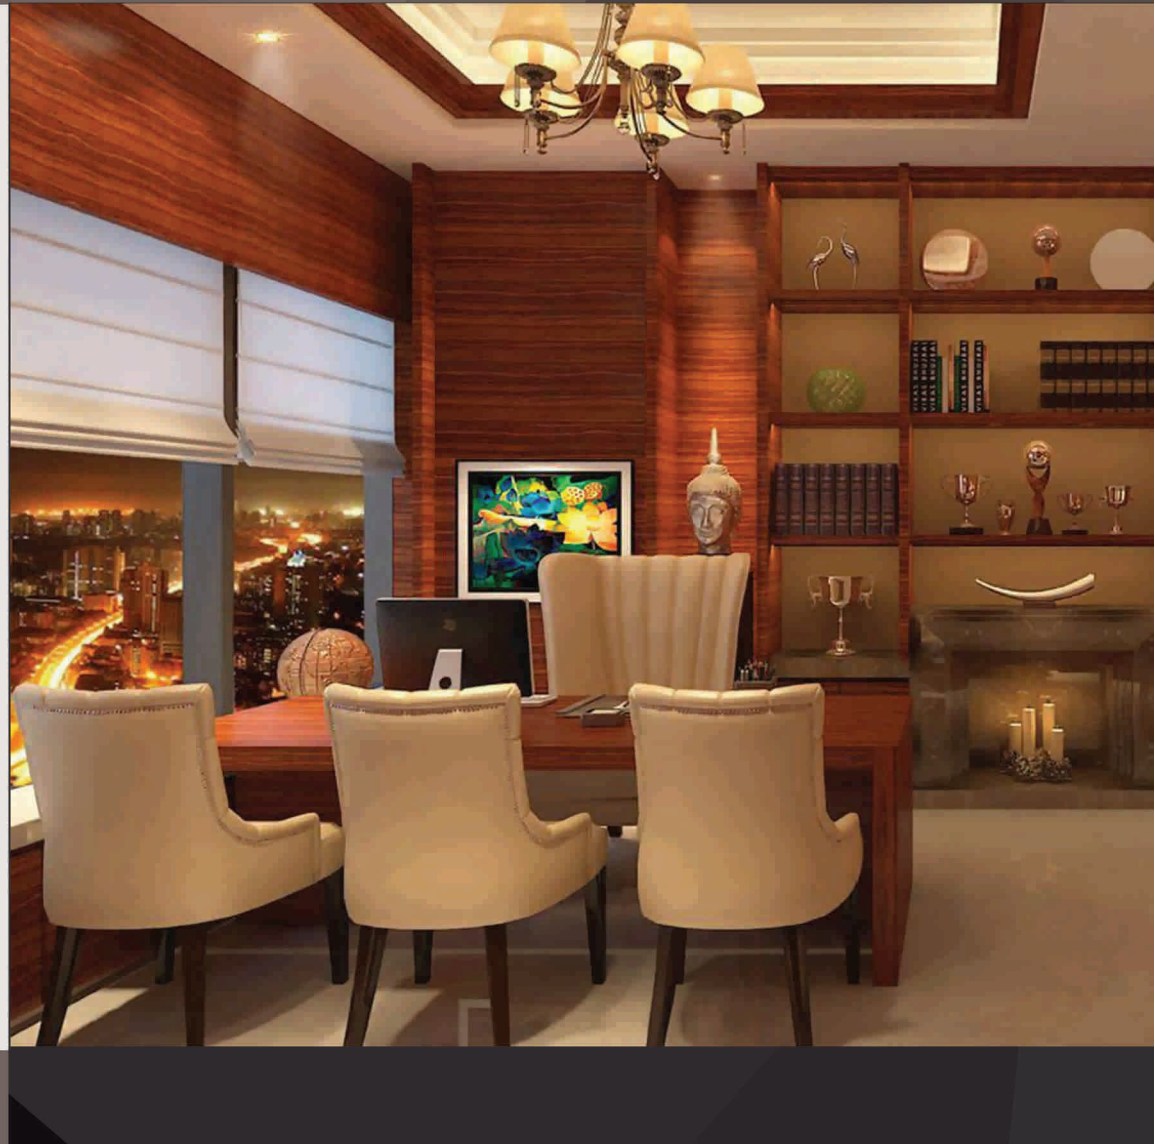

Stylish Office Cabinets

Make a wise investment.

Starwood PVC Foam Board provides maximum possibilities for customization and choice of colours.

Unlike wood, it resists termite attacks, flammability, and is moisture proof.

Get a modern touch, for many years to come!

Make your home A work of art

Perfect Material for Home Decor

PVC Foam Boards are favoured by architects and interior decorators for their value effectiveness, versatility, firmness and light weight.

Star Multiwood comes with smooth matte finish surface on both sides.

Make your home all the more unique.

Available in various densities, thickness, finish and colours to match your taste

Interior and exterior decoration

PVC Foam Boards are more favoured over Pywoods for their several bebefits:
PVC Foam Boards are easily laminated, engraved, milled, embossed, printed and painted as required. They have homogeneous core and smooth finish. They are ideal for drilling, screwing, nailing, sawing, heat folding and bonding. Sound and thermal insulation make them more favourites.
